The above applicant has applied for a disability permit to hunt specific big game and small game with a crossbow. State law restricts such permit to persons who have a disability, rendering them unable to hunt by conventional archery. This disability must be verified by a licensed physician, certified nurse practitioner, or certified physician assistant acting under the direction of a licensed physician, or licensed chiropractor. Please refer to the following guidelines to determine whether this applicant qualifies for a crossbow permit:

Many physicians or chiropractors have found that the following conditions individuals incapable of using conventional archery equipment: amputation of arm or hand, chronic dislocating shoulder, paralysis, severe chronic rotator cuff injury, severe heart condition, severe upper extremity arthritis, or other serious medical condition which makes use of conventional archery equipment impossible.
3. Physical conditions relating completely to the comfort level of the applicant are not acceptable criteria for the issuance of a crossbow permit.

The following is a brief statement of the disability: (Please type or print legibly)

[] This disability is temporary and will last for a minimum of two years from the date of this examination. [] This is a permanent disability.

Describe the disability and why the person is unable to use conventional archery equipment because of this disability.
